

The past – a Swedish perspective

Anna Rathsmann
(former DG SNSA)

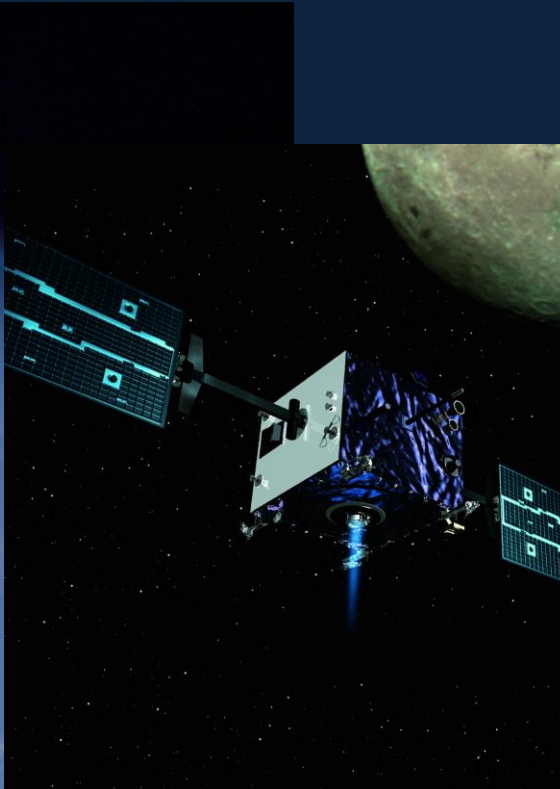

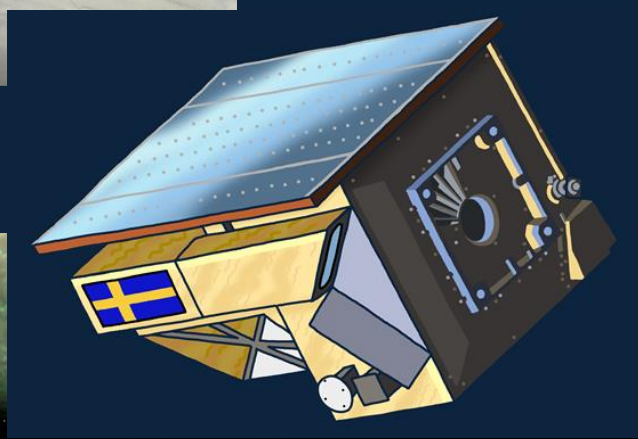

*EISCAT operate the most advanced radars on Earth,
enabling cutting edge science for the good of society*

EISCAT

A wide-angle photograph of a solar farm. The foreground and middle ground are filled with rows of solar panels, each mounted on a complex metal tracking system. The panels are arranged in a grid pattern that recedes into the distance. In the background, there are large, rugged mountains with some green vegetation and patches of snow or light-colored rock. The sky is blue with scattered white clouds. A tall, thin antenna or tower is visible on the left side of the image.
